College Operations Copilot — product video storyboard

9:33 · 1920×1080 · for teachers · step-by-step · narration: macOS Aman (Indian English), captions on screen · demo recorded on the deployed app with sample data · CURRENT PRODUCT scenes show the deployed app; FUTURE ROADMAP is not built.

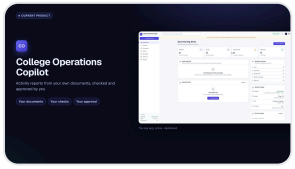

1. The problem CONTEXT 35 s

After every college activity, whether it is a workshop, a seminar or a quiz, a teacher has to prepare an activity report.

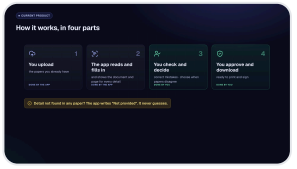

2. What we wanted CONTEXT 17 s

We wanted to save teachers from this repetitive work.

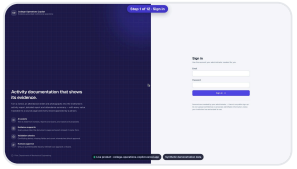

3. Introducing the app CURRENT PRODUCT 11 s

That is why we built College Operations Copilot.

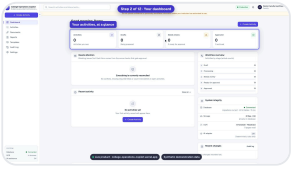

4. How it works, in four parts CURRENT PRODUCT 39 s

The idea is simple. There are four parts.

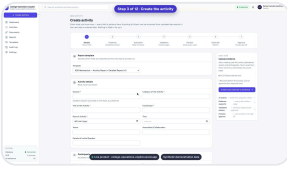

5. Sign in CURRENT PRODUCT 19 s

Let us begin. This is the real app, running online. For this demonstration, I am using sample documents for a made-up event, so no real student

6. Your dashboard CURRENT PRODUCT 18 s

This is your dashboard. It is your home page.

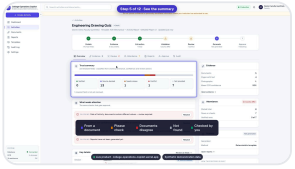

7. Create the activity CURRENT PRODUCT 26 s

This bar shows the whole journey, in seven steps, from entering the details to the final approval.

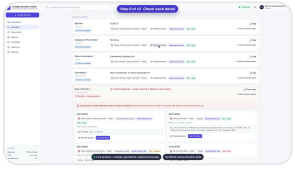

8. Upload your documents CURRENT PRODUCT 56 s

Now we upload the documents. First, choose what kind of document it is, for example, “Notice”. Then drag the file into this box, or click “browse files”.

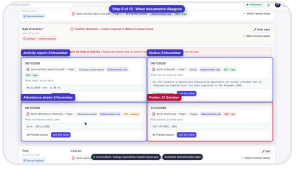

9. See the summary CURRENT PRODUCT 28 s

Now open the “Overview” tab. It gives you a quick summary of every detail in the report, using colours.

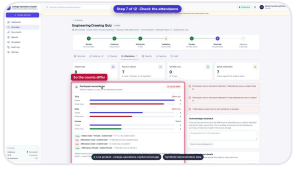

10. Check each detail CURRENT PRODUCT 40 s

Now open the “Review” tab. Here, every detail of the report is listed, one by one.

11. When documents disagree CURRENT PRODUCT 36 s

Now, the most important part. Look at the “Date of Activity”. It is marked in red, because the documents disagree.

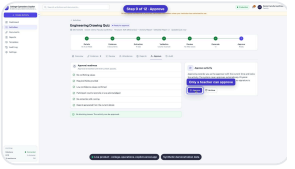

12. Check the attendance CURRENT PRODUCT 43 s

Next, the “Attendance” tab. The app has read the names from the attendance sheet.

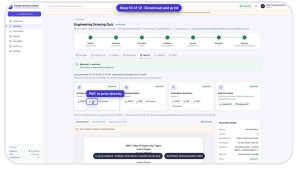

13. Create the reports CURRENT PRODUCT 40 s

Now open the “Reports” tab, and click “Generate reports”. The app creates three documents: the Activity Report, the Detailed Report, and the Attendance

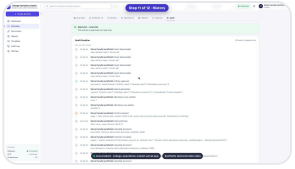

14. Approve CURRENT PRODUCT 19 s

When everything is checked, open the “Approve” tab. This checklist shows that every check has passed.

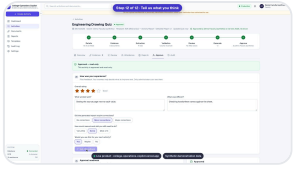

15. Download and print CURRENT PRODUCT 20 s

Now, download your files. Use the Word file if you want to make small changes before printing, or the PDF to print it directly.

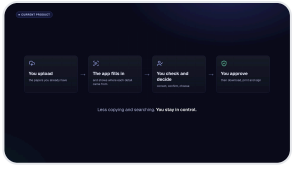

16. History CURRENT PRODUCT 11 s

The “Audit” tab keeps a history of everything that happened: every upload, every check, every decision, and the approval, with who did it, and

17. Tell us what you think CURRENT PRODUCT 25 s

After approval, the app asks for your feedback. You give a rating from one to five, write what worked well and what was difficult, and answer three short

18. Recap CURRENT PRODUCT 19 s

So, to recap. You upload your documents. The app fills in the details, and shows where each one came from. You check, and you decide. And you

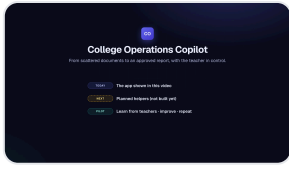

19. What we plan next FUTURE ROADMAP 37 s

What you have seen is what the app does today.

20. The pilot PILOT 22 s

That is why we are planning a pilot with the Mechanical Engineering department of KDK College of Engineering, Nagpur.

21. Closing CONTEXT 11 s

College Operations Copilot. From scattered documents to an approved report, with the teacher in control.
